
Frictionless sliding steel cable — rest-length sweep (s_f=1.1, θ=0°, p=1000 Pa)
Colour = cable rest length L_{rest} (viridis, short → long; orange = no cable)
Motif 1 — crown height & cable tension
Motif 2 — crown height & cable tension
crown height, no cable
crown height, with cable
cable tension
Crown height (mm)
Cable tension (N)
L_{rest} (m)
Motif 1 — shape profiles (solid=x=0, dashed=y=0)
Motif 2 — shape profiles (solid=x=0, dashed=y=0)
no cable
x=0 plane
y=0 plane
z (mm)
position along section (mm)
L_{rest}
no cable
1.20 m
1.25 m
1.30 m
1.35 m
1.40 m
Motif 1 — Gaussian curvature across the cable ($y = 0$)
Motif 2 — Gaussian curvature across the cable ($y = 0$)
Gaussian curvature K (m^{-2})
Motif 1 — section stress (y=0 plane)
Motif 2 — section stress (y=0 plane)
Von Mises stress (Pa)
