

Effect of material parameters on section outputs (no cable)
 $s_{wale} = s_{course} = 1.0$, $p = 1000 \text{ Pa}$, $\theta_{knit} = 0^\circ$
 non-swept: $E_1 = 10500 \text{ N/m}$, $r = 3.0$, $\nu_{12} = 0.195$ (dashed region = GP extrapolation)
